

BlueLine Bags

Modular Systems for Clinical Studies

The Best Solution for High Quality Medications

BlueLine Flexible and Simple

3L

BlueLine Bags are economical and durable insulated bags with 3l, 10l, 16l, or 30 liters of volume.

The deltaT fluid ensures that in the cold winter or hot summer days, a constant internal temperature is maintained and protects your products against cold and heat.

The deltaT BlueLine Bags can be equipped with +4°C fluid Accus. +22°C, -18°C, -21°C, and -30°C are available.

Whether you must provide medication at 2 to 8°C or 15 to 25°C for patient pick-up, BlueLine Bags with deltaT fluid Accus is the solution for you.

With BlueLine Bags transport times of up to 16 hours are possible. The Mini Vacuum Box 16L with TempShells can maintain 48 hours even in extreme heat.

delta T has a long-standing cooperation with the Pharmaceutical and Biotechnology industries and has experience in compiling individual systems.

The standard modules enables us to respond quickly to your needs.

delta T produces and delivers as a supplier for clinical trial systems tested according to GDP guidelines. Complete systems for clinical trials worldwide are available for you.

Clinical Studies

For the last mile at the perfect temperature

Blood Transport

For quick Transport of small Quantities

Medications

For cold chain transport from 2°C to 8°C

TempShell Elements

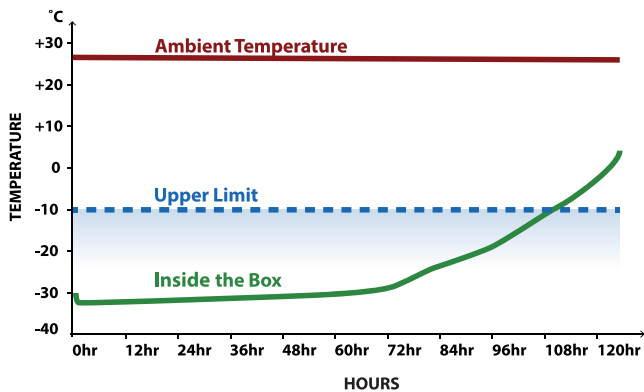

You can feel confident on long transports using our patented TempShell Elements.

This system is used for the transport of stem cells and valuable cargo by carriers, whether sent by plane or car. The individual TempShell Elements and TempShell frames are stackable and provide a perfect thermal barrier.

The modular system allows for different internal volumes.

Applications

The BlueLine Bags can be used together with corresponding Elements of different temperatures, for a variety of applications. This allows for transport times of up to 16 hours or more can be achieved.

Transport of Bone Marrow Donation

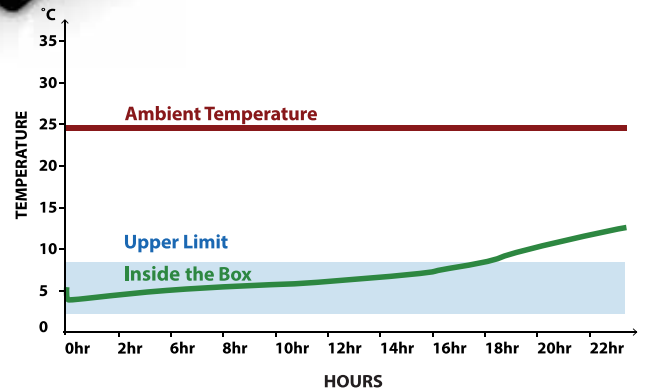

With a Mini Vacuum Box a courier is able to transport Bone Marrow from donor to receiver safely.

A 48 hour transport time allows worldwide logistic coverage.

Clinical Studies

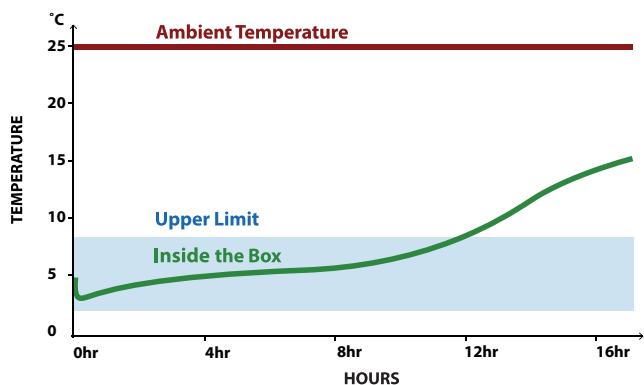

In clinical studies new high quality medication is administered worldwide. ΔT provides the appropriate cold chain solutions for the last mile. Our systems fulfill all requirements for your validation and guidelines.

Clinical Samples

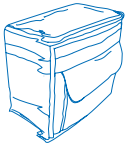

The shipment of clinical samples or laboratory samples requires light transport systems. A large number of samples must be brought to lab analysis.

The BlueLine Bags are easy to handle and disinfect due to their light plastic liner.

Order Information

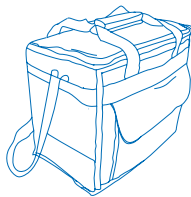

BlueLine Bag 3L

Order Number: B 1002 03 uk
 Dimensions: 240 x 120 x 170 mm
 Volume: 3L
 Weight: 0,24 kg

Suitable for:
 1 Pair Travelbag Accu
 and suitable for: 2 x Accu 200 ml

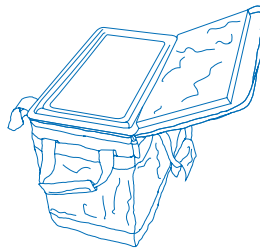

BlueLine Bag 10L

Order Number: B 1002 10 uk
 Dimensions: 350 x 240 x 230 mm
 Volume: 10L
 Weight: 1,06 kg

Suitable for:
 4 Pair TempShells or
 1 Pair TempShells and
 3 Pair TempFrames
 and suitable for: 2 x Accu 1L

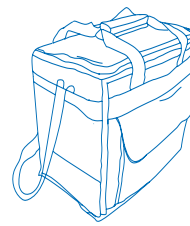

Mini Vacuum Box

Order Number: B 1001 16 uk
 Dimensions: 410 x 240 x 350 mm
 Volume: 16L
 Weight: 4,0 kg

Suitable for:
 5 Pair TempShells or
 1 Pair TempShells and
 4 Pair TempFrames
 and suitable for: 2 x Accu 1L

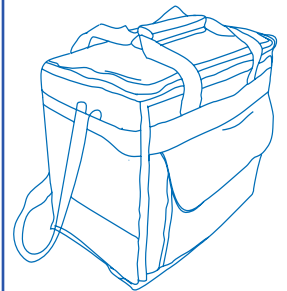

BlueLine Bag 16L

Order Number: B 1002 16 uk
 Dimensions: 380 x 200 x 330 mm
 Volume: 16L
 Weight: 1,6 kg

Suitable for:
 5 Pair TempShells or
 1 Pair TempShells and
 4 Pair TempFrames
 and suitable for: 2 x Accu 1L

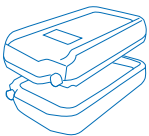

BlueLine Bag 30L

Order Number: B 1002 30 uk
 Dimensions: 410 x 240 x 350 mm
 Volume: 30L
 Weight: 2,1 kg

Suitable for:
 6 Pair TempShells or
 1 Pair TempShells and
 5 Pair TempFrames
 and suitable for: 2 x Accu S 1L

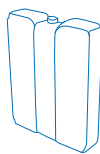

Travelbag Accu
