SMOKERS' CABINS – EXPERIENCE VARIETY

Highly efficient Extraction and Filtering - smoke & talk Technology

Behind the smoke & talk smokers' cabins is a clever system for capturing smoke: tobacco smoke is captured and evacuated like lightening through the finely perforated ceiling by the quiet but powerful exhaust air unit. Depending on the model, the integrated ash trays are also connected to the extraction system.

A 5-step filter system reliably retains pollutants:
The larger particles are first retained by a pre-filter stage. Filter stages 2, 3, 4 and 5 retain the very small particles, and all the gases in the tobacco smoke. The filtered, clean air is finally returned to the installation room.

The working method of the smokers' cabins has been tested and certified according to the German requirements for the testing and certification of systems for the protection of non-smokers, GS-BGIA-M14, edition 11/2007*. For you, that means: clean air, guranteed free of smoke!
*(pronounced by IFA former BGIA)

➡ polluted air
➡ filtered clean air

DESIGN LINE

Perfect Aesthetics
Symbiosis of style and function: the smoke & talk DESIGN LINE satisfies the highest demands, not just technically, but also in terms of design and workmanship.
The smokers' cabins, which are available in three standard sizes – for 4, 8 or 12 persons and in XXL versions – it also convinced the jury of the iF design award. The result: a prize in the Public Design/Interior Design category.

The DESIGN LINE leaves nothing to be desired as far as décor and choice of colours are concerned. Thanks to the three design versions Basic Decors, Colour Decors and Corporate Decors, your individually desired cabin can be planned quickly.

smoke & talk is unique - and will remain so.
It's design is protected by law!

Areas of use:
The DESIGN LINE is ideal for installation in hotels, reception areas, conference rooms, representative guest areas and wherever that little bit extra is called for in the design.

DESIGN LINE – winner of the iF product design award 2007

DESIGN LINE XXL

SMOKERS' CABINS – EXPERIENCE VARIETY

ECONOMY LINE

The economic Solution
Whether in production or administration areas – the advantages of the ECONOMY LINE cabins are convincing. The smokers' cabins provide protection of non-smokers directly at the workplace - and very economically at that. Thanks to its plain, unobtrusive design, the ECONOMY LINE can be integrated in any environment. Smokers' rooms and long walks for a cigarette break are things of the past – because a simple electrical socket suffices for installation.

Areas of use:
In Production plants, canteens, meeting rooms, etc. the ECONOMY LINE is perfect if an area is to be made free of smoke with functional, economic equipment.

ECONOMY LINE

INDIVIDUAL LINE

As individual as your Requirements
smoke & talk smokers' cabins impress even when things become special:
The fire load-neutral A-model is ideal for the furnishing for fire protecting areas.

The barrier-free smoke & talk implementation enables barrier-free access to the smokers' cabin. This cabin is ideal for use in rest homes and care centres, hospitals and public facilities.

You would prefer smoke & talk in an exhaust air version? Simply contact us. In this version of the cabin, the exhaust air is fed to the outside air via a pipe connection.

Areas of use:
With the INDIVIDUAL LINE technical protection of non-smokers can be achieved in wide corridors and escape routes, in rest homes and care centres and in hospitals and public facilities.

INDIVIDUAL LINE - fire load-neutral A-model

INDIVIDUAL LINE - barrier-free

SMOKERS' CABINS – EXPERIENCE VARIETY

HORECA LINE

Ideal for catering, cultural and leisure Facilities
The cabins from the HORECA LINE are distinguished by a wide range of colours and fittings that have been specially matched to the requirements of catering, cultural and leisure facilities. Due to the glass front panel, this cabin series replaces classic smoking rooms.
The smokers' cabins offer space for 4, 8 or 12 guests. If that is insufficient, there are also various XXL solutions available.

Further advantages that speak in favour of the HORECA LINE are the particularly stable, easy-care and durable design. In addition to that, the subtle combination of glass and laminated walls conveys openness without appearing cold.

Areas of use:
The cabins from the HORECA LINE provide for guaranteed clean air, regardless of whether it be in a restaurant, pub, discotheque, casino, gaming venue, shopping centre or a trade fair and concert hall.

HORECA LINE

HORECA LINE - inside a Café Bar
(individualised according to local legalisation)

HORECA LINE XXL

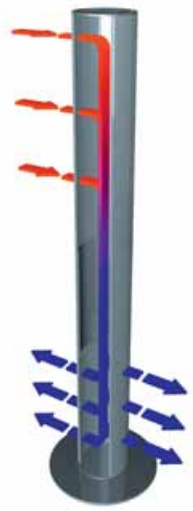

HORECA LINE - optimised for the use of gaming machines

AIR PURIFIERS FOR SMOKERS' ROOMS AND AND ALL KINDS OF INTERIOR ROOMS

Air Purifier Technology
Air purifiers by asecos have a five-stage filter system with coarse filter, fine filter, HEPA filter, active carbon and formaldehyde trap. Filter stages 1 to 3 extract all particulate pollutants from the air. Stage 4 filters all gaseous pollutants and odorous substances. Filter stage 5 eliminates finally harmful aldehydes. The polluted air is purified by the five filter stages and returned slowly to the installation room as clean air.

AIR PURIFIERS

Variety of Models for all Areas of Use
Three air purifier series offer the optimum solution for every application:

The AirOne series impresses with a clear, unobtrusive design and a self-confident language of forms. This led to the air purifier winning the red dot design award.

AirTwo, with its rear-lacquered glass fronts and distinctive linear form, has a noble, innovative appearance. The series is expected to be available from the 2nd quarter of 2011.

Air purification is possible in XXL format with the XXL Air Purifier series. On account of its very large filter package, this air purifier is ideal for areas that are highly frequented by people.

Each Air Purifier is available in two versions:
TYPE S for smokers' areas – cleans the room air polluted by tobacco smoke effectively and minimises cold smoke odours in smoking rooms. In combination with a modular partitioning wall system, a smoking room can be created quickly and simply with such an air purifier.
TYPE B all kinds of interior rooms – removes harmful substances and health-impairing pathogens from the room air.

Areas of use:
There is a great variety of areas of use: smokers' rooms, large offices, conference rooms, canteens, hospitals, fitness studios, discotheques.

A WORD REGARDING LEGAL SAFETY

There is no uniform legal standard in Europe for the protection of non-smokers.
What form does the current legislation take in your country?
What special regulations apply to public facilities?
What possible solutions exist for catering establishments?
What do you have to observe in your company?
How can you fulfil the legal requirements and ensure legal safety?

Our experts will be pleased to help you with these and many other questions – simply contact us at:
